CREATIVE TECHNOLOGIST/CREATIVE CODER

Studio PSK are looking for an exceptional Creative Technologist / Creative Coder to join the team. We want to find someone who can demonstrate an outstanding understanding and application of software and hardware. You should be comfortable working with a mixed creative team, on projects of different scales, for both local and international clients.

Key Skills & Experience:

- excellent knowledge of hardware programming on a range of platforms including arduino, raspberry pi, ARM etc.
- knowledge of how to scale technology systems from proof-of-concept to production
- backend web programming
- experience in combining software and hardware systems (eg API and IoT etc)

Extra Points For:

- design of custom PCBs and electrical systems
- AR/VR experience
- iOS programming
- unity experience

Location:

Peckham, South East London

Term:

full time with initial 2 month probation period

Salary:

dependent on experience

Benefits:

flexible working hours, 35 days holiday,

If this sounds like you, please contact hello@studiopsk.com with a CV/portfolio and some information as to why you're the best person for the job!
